What is this product?

Type

- This product is a class of shares of the Sub-Fund and denominated in EUR. The Fund is an investment company with a variable capital and qualifies as a Special Investment Fund ("SIF"), subject to the Luxembourg law of 13 February 2007 related to SIF and as an Alternative Investment Fund ("AIF") subject to the Luxembourg Law of 12 July 2013 related to Alternative Investment Fund Managers ("AIFM") and transposing Directive 2011/61/EC.
- As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

Investment objective:

- The Sub-Fund is a feeder fund of "Fimarge Fund – Fimarge Balanced Portfolio Fund" (the "Master Fund") and invests at least 85% of its total net assets in the Master Fund. The Sub-Fund may invest its remaining assets (i.e. up to 15% of its total net assets) in cash or cash equivalent investments. The Master Fund is a Luxembourg mutual fund subject to the provisions of Part 1 of the Law of 2010. The Master Fund targets long-term capital growth through mixed, flexible, and non-indexed management using wide risk diversification.

Investment policy:

- The Master Fund's net assets will be allocated according to the investment manager's convictions on market evolution, the economic environment, market opportunities etc. and with no restrictions or limits as to geographic, industrial or sectoral diversification.
- The Master Fund will invest in a selected portfolio of international equity and equity-linked instruments, bonds and debt securities and money-markets denominated in different currencies. The sub-fund achieves its aim by investing its net assets in and/or be exposed to:
 - 0-100% in fixed income transferable debt securities issued by governments, public or private companies, rated investment grade and with up to 50% of the net assets in high yield securities. The average rating of the bonds held by the sub-fund shall be at least BB- as rated by S&P or Ba3 as rated by Moody's. Fixed income products from emerging countries may not exceed 25% of net assets. The Master Fund may invest up to 15% of the net assets in contingent convertible bonds ("Cocos"). The Master Fund may invest up to 15% in unrated bonds. The Master Fund will not invest in securitization instruments (ABS, CMBS, CLO or CLN).
 - 0-35% in equities, equity-linked instruments across all industrial sectors and geographical zone and sizes of stock market capitalization. The geographic and sectorial mix of issuers is not determined in advance and will be achieved on the basis of the market opportunities.
 - 0-10% in UCITS and/or other UCI (including ETFs).
 - 0-50% in securities and/or currencies other than Euros. The exposure to foreign exchange risk will be made on the basis of a global macroeconomic analysis.

- The Master Fund may hold, on a temporary basis, up to 100% of its assets in cash or money market instruments (i.e. cash and short term deposits, certificates of deposit and bills, money market funds).
- It may also hedge its exposure to non-euro currencies according to the investment manager's conviction.
- It should be noted that the investment policy of the sub-fund is to invest in the shares or units of UCITS and or other UCI (including ETFs) (within the limit indicated above) and that entails a double payment of fees (such as subscriptions and redemptions fees, management fees. . .). The total management fee calculated based on actual management fees costs paid on behalf of fund holdings, may vary up to 2.5% of their respective net assets.
- The Master Fund may not use derivatives, financial techniques or instruments and will not conclude securities' lending transactions and repurchase agreements. The Sub-Fund may use only forwards on currencies and only in order to hedge the currency exposure of the portfolio up to 50% of its net assets in accordance with Part I - Chapter 5 of the Prospectus. The forward will be used to adjust the portfolio's currency allocation.
- The Master Fund is actively managed without reference to a benchmark.
- This financial product does not promote environmental or social characteristics and does not have as its objective a sustainable objective.
- The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
- Given the above investment objective and policy and the risk and reward profile of the product, the recommended holding period is 5 years.
