This fund is managed by Andbank Asset Management Luxembourg

Objectives and Investment Policy

- The investment objective of the Sub-Fund is to provide an attractive rate of return for investors. No guarantee can be given that the Sub-Fund's objective will be achieved and that investors will recover the amount of their initial investment.
- The investment strategy of the Sub-Fund is to invest a minimum of 75% of the net assets in units of other UCITS and/or for a maximum of 30% in units of other UCIs. These will include equity funds, fixed income funds, mixed funds and money market funds. The Sub-Fund may also invest directly in equity and fixed income securities.
- The Sub-Fund may implement the foreign exchange hedge by using certain financial derivative instruments. Risk and Reward Profile

- Historical data used may not be a reliable indication of the future risk profile of the sub-fund.
- This category is not guaranteed to remain unchanged and may shift over time.
- The lowest class does not mean that the investment is risk free.
- This fund was categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. This indicator is based on the simulated historical weekly volatility of a reference portfolio over the last 5 years.

The sub-fund is subject to the following risks:

- **Credit risk:** the Fund invests in securities which are exposed to the risk that the issuer will be unable to meet its repayment obligations. The credit rating and risks associated with such securities can change over time and therefore affect the value of the investments.
- **Liquidity risk:** Securities may become less liquid during extreme market conditions and it may be difficult for unitholders to get redemption proceeds in a timely manner.
- **Counterparty risk:** Risk that the counterparty to mutually agreed contracts does not meet its obligations.
- **Operational risk:** Risk of material loss resulting from human error, technical faults, inappropriate procedures or controlling.
- **Use of derivatives:** The sub-fund invests in derivatives for hedging and other investment purposes, increasing or reducing exposure to underlying assets.
- **Currency risk:** Investments in securities denominated in currencies other than the Sub-fund's Base Currency may be subject to adverse fluctuation in currency exchange rates.
- **Duplication of certain fees and expenses:** Where investments are made in other funds, this might result in duplication of certain fees and expenses for investors. Investors are also subject to potential risks associated with such funds.
- **Market risk:** The value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
