a sub-fund of SIGMA INVESTMENT HOUSE FCP

This fund is managed by Andbank Asset Management Luxembourg

Objectives and Investment Policy

- The investment objective of the Sub-Fund is to achieve a combination of income and long-term capital appreciation, with a maximum annualized volatility, under normal market conditions, of 30%. There is however no guarantee that this objective will be achieved.
- The Sub-Fund will seek to achieve its investment objective by investing essentially in a portfolio of UCITS and/or other UCIs that will have exposure to a range of asset classes including, but not limited to, equity securities, debt securities (including below investment grade debt securities), convertible bonds, currencies and money market instruments. Some of the UCITS and UCIs will pursue alternative investment strategies and/or will invest in financial derivative instruments to achieve their investment objective. Issuers of the underlying investments may be located in any country, including emerging markets.
- Global equity exposure will range between 75% and 100%, whereas the remainder of the portfolio will be exposed to the other specified asset classes, also through the combination of UCITS and UCIs.
- The Sub-Fund may also invest through the underlying UCITS or UCIs into high yield securities and below investment grade securities limited to an aggregated exposure of 25% of the portfolio.
- The Sub-Fund is actively managed without reference to a benchmark
- Unitholders may redeem units on demand, on a daily basis.
- Notwithstanding the above provisions and if justified by the Investment Manager's expectations or exceptional market conditions, the Sub-Fund may invest up to 100% of its net assets in cash and cash equivalents such as (but not limited to) money market instruments, government bonds (and/or money market UCITS/UCI)
- The Sub-Fund may deal with financial derivative instruments traded on a Regulated Market and/or OTC both for investment and/or hedging purposes
- The investment manager may invest in emerging markets, through the underlying UCITS or UCIs, up to 30% of its assets.
- Non-distributing units: any income generated by the Sub-Fund is reinvested.

Risk and Reward Profile

- Historical data used may not be a reliable indication of the future risk profile of the sub-fund.
- This category is not guaranteed to remain unchanged and may shift over time.
- The lowest class does not mean that the investment is risk free.
- This fund was categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. This indicator is based on the historical weekly volatility of Euro Overnight Index Average over the past 5 years and places the sub-fund in this category.

The sub-fund is subject to the following risks:

- **Credit risk:** the Fund invests in securities which are exposed to the risk that the issuer will be unable to meet its repayment obligations. The credit rating and risks associated with such securities can change over time and therefore affect the value of the investments.
- **Liquidity risk:** Securities may become less liquid during extreme market conditions and it may be difficult for unitholders to get redemption proceeds in a timely manner.
- **Counterparty risk:** Risk that the counterparty to mutually agreed contracts does not meet its obligations.
- **Operational risk:** Risk of material loss resulting from human error, technical faults, inappropriate procedures or controlling.
- **Use of derivatives:** The sub-fund invests in derivatives for hedging and other investment purposes, increasing or reducing exposure to underlying assets.
- **Currency risk:** Investments in securities denominated in currencies other than the Sub-fund's Base Currency may be subject to adverse fluctuation in currency exchange rates.
- **Duplication of certain fees and expenses:** Where investments are made in other funds, this might result in duplication of certain fees and expenses for investors. Investors are also subject to potential risks associated with such funds.
- **Market risk:** The value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
