BISONTE SICAV - Multi Value Allocation - Class - A (ISIN:LU1731834617)

a sub-fund of BISONTE SICAV

This fund is managed by Andbank Asset Management Luxembourg

Objectives and Investment Policy

- The target is to reach, over the long term, a return of Euribor 3 months +250 bps via investments in different asset classes. The main source of the return will result from the asset allocation decisions.
- The global approach of the Sub-Fund is to be flexible and benchmark-agnostic, i.e. the assets will principally be allocated on the basis of the risk-return profile of each potential investment and on the correlation with the other investments in the portfolio.
- The Sub-Fund does not intend to invest in China, Russia or India. Nevertheless, it may gain exposure to Russian, Indian and Chinese A-Shares markets indirectly by investing in UCITS investing directly or indirectly in Chinese A-Shares. These investments will be nevertheless limited to 10% of the Sub-Fund's net assets.
- The asset allocation and asset exposure in any given asset class will be managed dynamically. The Sub-Fund will principally invest in equities and equity related securities (including, but not limited to, convertible bonds, equity linked notes, low exercise price warrants and warrants on equities), fixed income securities, and money market instruments, UCITS and UCI (including those established as exchange traded funds).
- The Sub-Fund will not invest more than 5% in bonds which, at time of investments, are rated below speculative grade (CCC) by one or more of the main agencies (Moody's, Standard & Poors & Fitch). For a maximum of 25% of its net assets, the Sub-Fund may seek exposure to commodity markets through eligible exchange traded commodities (ETC) (according to the Law of 2010 and relevant CSSF circulars).
- The Sub-Fund will not invest more than 20% in bonds which, at time of investments, are rated between investment grade (Baa3/BBB-) and speculative grade (CCC) by one or more of the main agencies (Moody's, Standard & Poors and Fitch).
- For hedging and for investment purposes, the Sub-Fund may use financial derivative instruments traded on a regulated market, provided they are contracted with first class financial institutions specialized in this type of transactions. In particular, the Sub-Fund may take exposure through financial derivative instruments and forwards on any eligible underlying, such as but not limited to currencies, interest rates, transferable securities or financial indices.
- The Sub-Fund may receive OTC derivatives (including, but not limited to, warrants) via corporate actions. However it will not invest directly in OTC derivative except from forwards. The Sub-Fund will not invest in asset backed securities or in mortgage backed securities.
- Non-distribution shares: any income generated by the sub-fund is reinvested.

Risk and Reward Profile

- Historical data used may not be a reliable indication of the future risk profile of the sub-fund.
- This category is not guaranteed to remain unchanged and may shift over time.
- The lowest class does not mean that the investment is risk free.
- This fund was categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average. This indicator is based on benchmarks historical performance data based on the last 5 years volatility and places the sub-fund in this category.

The sub-fund is subject to the following risks:

- **Credit risk:** the Fund invests in securities which are exposed to the risk that the issuer will be unable to meet its repayment obligations. The credit rating and risks associated with such securities can change over time and therefore affect the value of the investments.
- **Counterparty risk:** the Fund is backed by a guarantee from, or has material investment exposure through contracts with, a third party.
- **Use of derivatives:** the Fund invests in Derivatives for hedging and other purposes.
- **Currency risk:** Investments in securities denominated in currencies other than the Sub-fund's Base Currency may be subject to adverse fluctuation in currency exchange rates.
- **Market risk:** The value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
