Risk and Reward Profile

The sub-fund is subject to the following risks:

• Credit risk: the Fund invests in securities which are exposed to the risk that the issuer will be unable to meet its repayment obligations. The credit rating and risks associated with such securities can change over time and therefore affect the value of the investments.
• Liquidity risk: Securities may become less liquid during extreme market conditions and it may be difficult for unitholders to get redemption proceeds in a timely manner.
• Counterparty risk: Risk that the counterparty to mutually agreed contracts does not meet its obligations.
• Operational risk: Risk of material loss resulting from human error, technical faults, inappropriate procedures or controlling.
• Use of derivatives: The sub-fund invests in derivatives for hedging and other investment purposes, increasing or reducing exposure to underlying assets.
• Currency risk: Investments in securities denominated in currencies other than the Sub-fund's Base Currency may be subject to adverse fluctuation in currency exchange rates.
• Duplication of certain fees and expenses: Where investments are made in other funds, this might result in duplication of certain fees and expenses for investors. Investors are also subject to potential risks associated with such funds.
• Market risk: The value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
