What is this product?

Type

- This product is a class of shares of the Sub-Fund and denominated in EUR. The Fund is an open-ended investment company with variable capital ("SICAV") and qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS"), subject to Part I of the Luxembourg law of 17 December 2010 related to undertakings for collective investments ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.
- As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

Investment objective:

- The Sub-Fund seeks to provide investors with an investment option based on a careful selection of fixed income securities (including but not limited to government bonds, corporate bonds, junior debt securities, convertible bonds and contingent convertible bonds) with the objective of achieving a positive long-term absolute return.

Investment policy:

- In pursuance of its objective, the Sub-Fund will directly or indirectly invest more than 80% of its assets in bonds.
- At least 50% of the Sub-Fund's net assets will be invested in investment grade bonds with a lower credit risk, issued or guaranteed by public entities of the European Union, or public and private issuers with an investment grade rating. Where an obligation ceases to be rated "investment grade", it will no longer be considered for the minimum limit of 50% of bonds with lower credit risk, and the manager shall make any changes to the portfolio of the Sub-Fund necessary to comply with this limit with the smallest delay as possible in the best interest of shareholders.
- As an element of diversification from traditional fixed income securities and complementing the strategy in search of an attractive risk-adjusted return, the Sub-Fund may also invest up to 5% of its net assets in convertible bonds and up to 15% in contingent convertible bonds that is, in aggregate 20% (the average exposure considering both asset classes will be around 10%) from highly liquid instruments issued essentially from well-recognized credit institutions, rated at least as investment grade, notwithstanding the issue rating might be lower than the issuer rating.
- The Sub-Fund may invest up to 10% of its net assets in other UCITS and/or other UCIs.
- The Sub-Fund may invest in assets denominated in currencies other than the Euro.
- The Sub-Fund may hold on an ancillary basis up to 20% of its assets in cash and such as bank deposits at sight in accordance with the provisions of Article 41(2) of the Law of 17 December 2010. Notwithstanding the above provision, the above mentioned 20% limit shall only be temporarily breached for a period of time strictly

necessary when, because of exceptionally unfavourable market conditions, circumstances so require and where such breach is justified having regard to the interests of the investors, for instance in highly serious circumstances such as the September 11 attacks or the bankruptcy of Lehman Brothers in 2008.

- The Sub-Fund may use financial derivative instruments for hedging or investment purposes.
- The Sub-Fund is actively managed without reference to a benchmark.
- This financial product does not promote environmental or social characteristics and does not have as its objective a sustainable objective.
- The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
- Given the above investment objective and policy and the risk and reward profile of the product, the recommended holding period is 5 years.

Distribution policy: Non-distributing shares: any income generated by the Sub-Fund is reinvested.
