Accurate as of: 17 March 2025

What is this product?

Type

- This product is a class of shares of the Sub-Fund and denominated in EUR. The Fund is an open-ended investment company with variable capital ("SICAV") and qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS"), subject to Part I of the Luxembourg law of 17 December 2010 related to undertakings for collective investments ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.
- As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

Investment objective:

- The investment manager employs a top-down approach to assess global macroeconomic factors, such as GDP, inflation, interest rates, and trade balances, to identify attractive sectors or regions, primarily within OECD countries. A bottom-up approach follows, focusing on company-specific criteria like debt levels, cash flow generation, growth potential and peer comparisons. The investment strategy seeks to allow the investment manager to adapt allocations based on selected sectors, industries, or regions.

Investment policy:

- The investment strategy of the Sub-Fund is to invest in a broad range of asset classes such as but not limited to fixed income, money market instruments, equity-related securities, including a maximum of 30% in exchange-traded funds ("ETFs") and other UCIs and cash and cash equivalents. Investments can be done directly or indirectly, through financial derivative instruments or other UCITS/UCIs.
- The Sub-Fund will primarily invest in the OECD countries, but it may however take exposure to emerging markets funds up to 20% of the assets of the Sub-Fund.
- The Sub-Fund will invest a minimum of 80% of its assets in fixed income securities, and it may also invest in equity or equity-related securities for the remaining part.
- The Sub-Fund will invest mainly in securities rated as investment grade. The exposure to non-investment grade securities will not represent more than 49% of the assets of the Sub-Fund. The Sub-Fund will not invest in distressed and defaulted securities and in the case a bond held by the Sub-Fund experiences a downgrade rated as distressed, it will be sold as soon as possible, in the best interests of shareholders.
- The exposure to contingent convertible bond ("CoCos") will not exceed 10% of the assets of the Sub-Fund.
- The exposure to mortgage-backed security ("MBS") and asset-backed securities ("ABS") combined will not represent more than 10% of the assets of the Sub-Fund.
- The Sub-Fund may use financial derivative instruments for both hedging and/or investment purposes. The types of derivatives may

include, but are not limited to, interest rate and credit derivatives, single stock and equity index futures comprised by a basket of securities listed within an specific stock market and options, currency futures and forwards, OTC derivatives, single stock CFDs, basket CFDs and index CFDs.

- The Sub-Fund may hold, up to 20% of its net assets, in ancillary liquid assets which consist of bank deposits at sight in accordance with the provisions of Article 41(2) of the Investment Fund Law. Notwithstanding the above provision, the above mentioned 20% limit shall only be temporarily breached for a period of time strictly necessary when, because of exceptionally unfavourable market conditions, circumstances so require and where such breach is justified having regard to the interests of the investors.
- This financial product does not promote environmental or social characteristics and does not have as its objective a sustainable objective.
- The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
- Given the above investment objective and policy and the risk and reward profile of the product, the recommended holding period is 5 years.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performances of the product over the last 10 years, by identifying, depending on the performance scenarios and as defined in the Key Information Document's EU regulation, all overlapping sub-intervals individually (i) equal in length to the recommended holding period which start or end in each month which are contained within that period of 10 years or (ii) equal or shorter in length to the recommended holding period, but equal to or longer than one year, which end at the end of that period of 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 30 September 2017 and 30 September 2022.

Moderate: this type of scenario occurred for an investment between 31 January 2020 and 31 January 2025.

Favourable: this type of scenario occurred for an investment between 19 February 2016 and 19 February 2021.

What happens if Andbank Asset Management Luxembourg is unable to pay out?

You are exposed to the risk Andbank Asset Management Luxembourg, might be unable to meet its obligations in connection with the product. This may materially adversely affect the value of the product and could lead to you losing some or all your investment in the product. A potential loss is not covered by an investor compensation or protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed (i) in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario and (ii) € 10,000 is invested.

Example Investment € 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	€ 62	€ 366
Annual cost impact*	0.6%	0.7%

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period, your average return per year is projected to be 3.0% before costs and 2.4% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	0.00% , we do not charge any entry fee. In case of conversion into another class or another sub-fund, no conversion fee is charged but you may be requested to bear the difference in subscription if higher.	up to € 0

Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.38% of the value of your investment per year. Such estimate has been carried out by adopting as proxy either a comparable PRIIP or a peer group.	€ 38
Transaction costs	0.24% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€ 24
Incidental costs taken under specific conditions		
Performance fees	0.00% . There is no performance fee for this product.	€ 0

How long should I hold it and can I take money out early?

Recommended Holding Period ("RHP"): 5 years

The RHP has been defined by taking into account the above investment policy and risk and reward profile. You should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty prior to the end of the RHP, or hold the investment longer. Investors may request redemption of shares no later than 3.00 p.m., Luxembourg time, on the business day preceding the applicable Valuation Day. Redemption requests received after this time and date will take effect on the next following Valuation Day. The redemption price shall be paid no later than 2 business days following the applicable Valuation Day. Any cashing-in before the end of the RHP may have a negative consequence on your investment.
