SIGMA INVESTMENT HOUSE FCP – Best Morgan Stanley - CLASS A EUR INTENDED FOR RETAIL INVESTORS (ISIN: LU1697018064)

a sub-fund of SIGMA INVESTMENT HOUSE FCP
Management Company: Andbank Asset Management Luxembourg

Objectives and investment policy

- The investment objective of the Sub-Fund is to provide maximum long-term return through investing mainly in assets of the Morgan Stanley Management and aiming to a volatility of the fund of less than 10% annually.
- The Sub-Fund will invest at least 75% of the net assets in units of other UCITS, UCIs and eligible Exchange Traded Funds (“ETFs”), including mainly those managed by companies in the Morgan Stanley Group (“target funds”).
- Such target funds will have exposure to a range of asset classes including, but not limited to, equity securities, debt securities (including investment grade and below investment grade debt securities), convertible bonds, currencies and money market instruments.
- The investment manager may invest in emerging markets, through the underlying target funds, up to 20% of its assets.
- The Sub-fund may also invest through the underlying target funds into high yield securities and below investment grade securities limited to an aggregated exposure of 55% of the portfolio.
- Notwithstanding the above provisions and if justified by the Investment Manager’s expectations or exceptional market conditions, the Sub-Fund may invest up to 100% of its net assets in cash and cash equivalents such as (but not limited to) money market instruments, government bonds (and/or money market UCITS/UCI)
- Unitholders may redeem units on demand, on a daily basis.
- Non-distributing units: any income generated by the sub-fund is reinvested.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data used may not be a reliable indication of the future risk profile of the sub-fund.
- This category is not guaranteed to remain unchanged and may shift over time.
- The lowest class does not mean that the investment is risk free.
- This indicator is based on the historical volatility of the reference portfolio over the past 5 years and places the sub-fund in this category. This fund was categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average.

The sub-fund is subject to the following risks:

- **Credit and interest rate risks:** the value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer.
- **Liquidity risk:** securities may become less liquid during extreme market conditions and it may be difficult for unitholders to get redemption proceeds in a timely manner.
- **Management Style Risk:** The risks faced by target UCITS and/or UCIs corresponding to their specific management styles may lead to losses.
- **Equity Risk:** The value of equities and equity-related securities can be affected by daily stock market movements.
- **Use of derivatives:** derivatives are used to obtain, increase or reduce exposure to underlying assets.
- **Currency risk:** Investments in securities denominated in currencies other than the Sub-fund’s Base Currency may be subject to adverse fluctuation in currency exchange rates.
- **Emerging Markets risk:** Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. As a consequence emerging markets securities may be subject to higher volatility and lower liquidity than non-emerging markets securities.
- **Duplication of certain fees and expenses** when investing in other UCITS and/or other UCIs.
