Investment Growth vs Benchmark

Time Period: 01/08/2018 to 31/07/2021

Investment Objective

The sub-fund aims to achieve a return above Euribor 3 months + 150 bps with a volatility around 6% through the investment in units of UCITS and UCIs, and eligible Exchange Traded Funds (ETFs). Such UCITS and UCIs will have exposure to a range of asset classes including, but not limited to, equity securities, debt securities, raw materials, real estate investment funds and alternative investment strategies.

The investment manager will apply an asset allocation methodology on a global multi-asset universe to obtain a global portfolio with moderate level of risk and investment horizon between 3 and 5 years. Such methodology stands on three main pillars: global portfolio diversification, long term stable returns and risk control.
