India after five years of Modi's government. What progress has been made?

What follows is an interesting summary of the main promises made in 2014 by Modi (*BJP's manifesto*), as well as the degree of fulfillment of these promises. This is a useful exercise to assess the improvement in each segment of the economy in India, as well as to assess **the current state of the country as a starting point for the future**. The analysis of the government action has been done by Reuters and independent sources and categorized into three groups: **FULFILLED**, **PARTIALLY FULFILLED**, and **NOT FULFILLED**.

If I had to make a quick assessment, I would say that a majority of promises (80%) have been fulfilled or partially fulfilled. Especially in the areas of economy, industry and agriculture.

Just hope this exercise will be helpful.
