World – Covid dynamics

Ideas a destacar:

1. Sigue aumentando el caso de países con variación diaria negativa en los casos activos (Alemania, España, Irán, Suiza, Corea, Hong Kong, Uruguay, Argentina y Andorra).
2. Sigue aumentando el numero de países en los que el % de recuperados sobre el total infectados supera el 50%
3. Sigue aumentando a nivel mundial el % de recuperados sobre total casos registrados (hoy en 23.5%, desde 23.1% de ayer, y 20.6% del día 5 de abril)
4. Por el lado negativo, parece aún una tarea inconmensurable conseguir que todos los países alcancen un control efectivo y definitivo. De los cerca de 100 casos en china, una decena son casos no importados. Con que un solo país no lo consiga, podría convertirse de facto en un nuevo foco de infección para el resto.
