World – Covid dynamics

A destacar:

1. Vuelve a aumentar el ratio Recuperados / Total Infectados registrados a nivel mundo: Hoy salta hasta el 24.8% desde el 23,5% de ayer. Queda lejos el 20.6% del día 5 abril. Esto significa que los nuevos casos de infecciones (denominador) presentan un crecimiento decreciente en relación al ritmo de las recuperaciones.
2. Importante!! Sigue aumentando el nº de países (de la muestra) con variación diaria negativa en los casos activos: Alemania (2º día), Irán (10º día), Suiza (2º día), Corea (13º día), Hong Kong (11º día), Uruguay (4º día), Argentina y Andorra.
3. Sigue aumentando el numero de países en los que el % de recuperados sobre el total infectados supera el 50% (hoy se une al grupo Brasil. El resto son China, España, Suiza, Corea, Uruguay, Brasil)
