Italy, Spain, USA, Germany, World – Covid dynamics

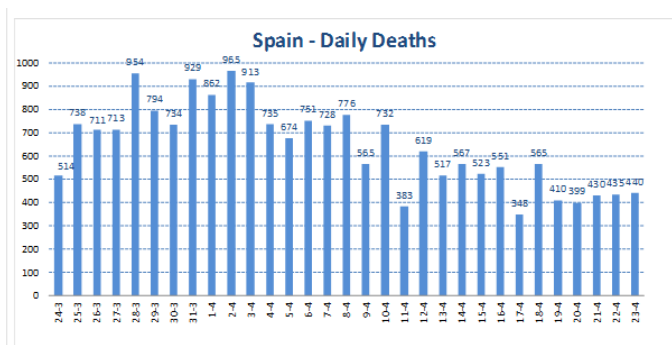

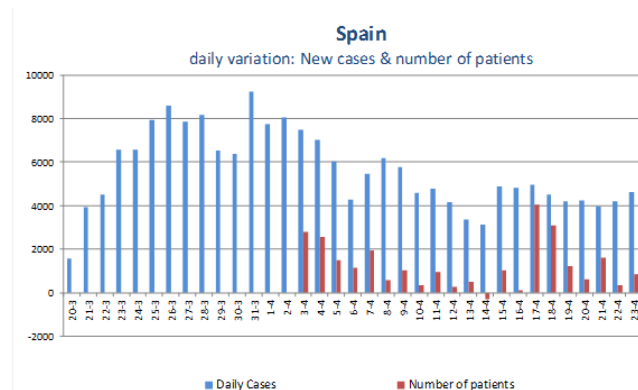

ITALY

Fourth day in a row with the number of patients decreasing and the trend is not due to the number of deaths, but rather to the fact that the recovered patients totaled 3,033 on the day, while the new infections totaled 2,646.

SPAIN

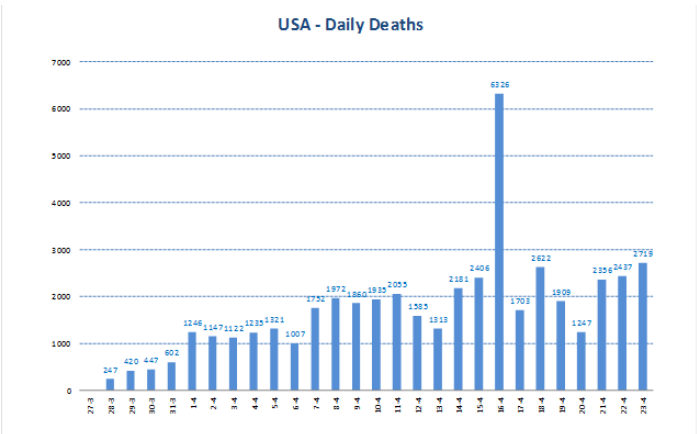

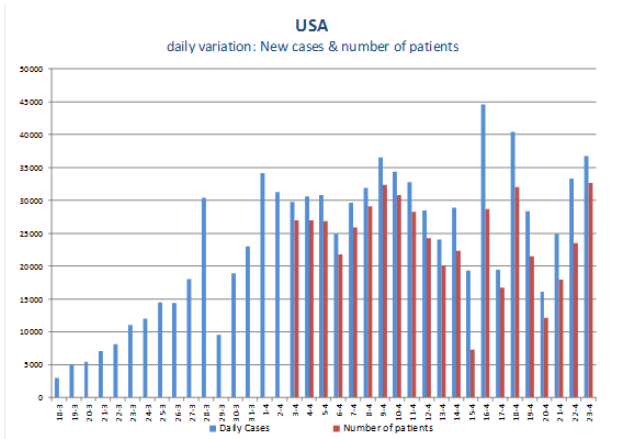

In just one word: Bad. Something is not being done well, after 1.5 months of confinement, the number of new daily cases is still too high (> 4000s), and the country has been stagnant around the same number for 10 days. The number of active patients has not yet started to decrease.

USA

Also, disappointing figures today. Looking at the series for this country, it seems that pandemic control is still a long way off.

Bad news!

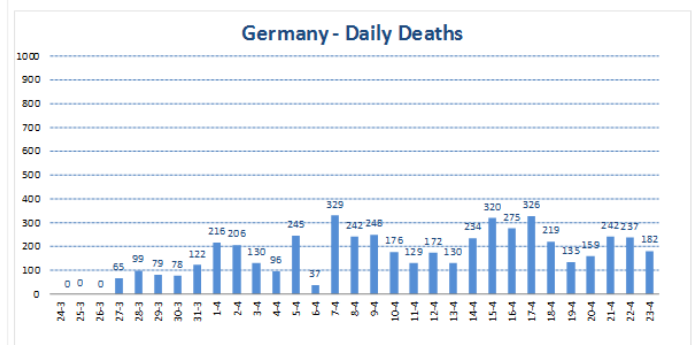

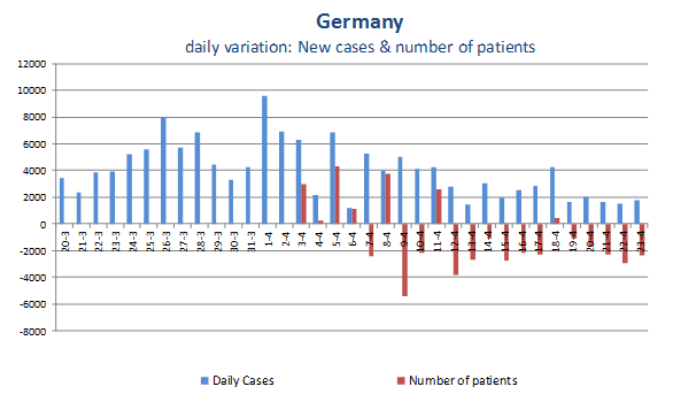

GERMANY

Spectacular.

Encouraging figures again. Almost two weeks reducing the number of active patients, at a rate of > 2,000 daily.

Is it too much to ask that the rest of countries simply imitate those who achieve satisfactory results?
